Together let's create

The Terrace

on the 7th Floor

An outdoor space for renewal, respite and gathering.

The Terrace on the 7th Floor is one more way we can help our patients, families and staff feel calmer, find an oasis, and have energy restored. The importance of spaces like this should not be underestimated.

– Nancy Dahlberg, RN
ICU Manager

Patients, families and staff often need a counterbalance to hospital life. A place to clear minds, to reflect and renew or simply just step outside to get fresh air and sunshine.

With the construction of the final four floors of the River Pavilion patient care tower, there is an opportunity to create such a place – The Terrace on the 7th Floor.

The Terrace will

- Invigorate and rejuvenate our staff as they seek an antidote to the stress of caregiving
- Be easily accessible to patients including Acute Care, ICU and Pediatrics
- Be a place to grab a cup of coffee and enjoy the sights from one of the highest locations in the Tri-Cities with views of the Columbia River and Rattlesnake Mountain
- Have space available for those who need to spend time alone or gather with family and friends

Quite simply, The Terrace will be a place to find reduced stress, increased energy and restored hope.

The Terrace on the 7th Floor is currently not included in the tower construction budget. It is such an important addition that Kadlec employees are spearheading an effort to make it a reality.

More information to come on how to participate in this project.
